

SOLUTION OVERVIEW

Challenge

To create an intuitive and flexible electronic billing system

Solution

DART software provides a completely customizable solution for entering job data and complex invoice processing

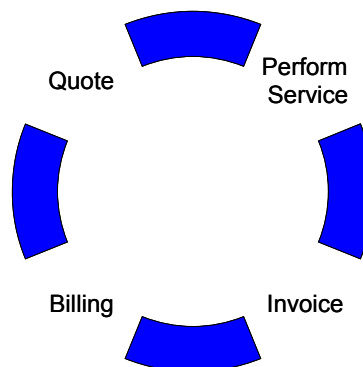

Inversion Technologies provides completely customizable electronic billing software without the traditional costs and challenges. DART™ takes you from quote to invoice, providing an intuitive interface for capturing job data in a format that makes sense to your business needs. In many cases, the logic required to convert job data into invoices can be quite complex, resulting in inconsistency and inaccuracy of field-entered invoice data. However, DART™ stores complex line item calculations in electronic “price books” freeing the user to simply enter the appropriate products and services.

Traditionally, custom software would translate to long lead times and great expense. Quite the opposite is true with DART™. In most cases, a new client can be up and running in a matter of days or weeks. With minimal lead times, there is very little risk with DART™.

The screenshot shows the 'Perforation Service' window. It has tabs for 'Service' and 'Runs'. Under 'Runs', there is a 'Run Number' field with a dropdown arrow and a value of '1', and buttons for 'New', 'Copy', and 'Delete'. Below this is the 'Run Info' section with tabs for 'Run Info', 'Intervals', and 'Attachments'. The 'Run Info' tab is active, showing 'Start' (500.0) and 'End' (506.0) fields, and buttons for 'New', 'Copy', and 'Delete'. To the right are fields for 'Top Shot: 500 (m)', 'Bottom Shot: 506 (m)', and 'Total Shots: 84.0 (all intervals)'. The 'Perforation Interval' section includes dropdowns for 'Gun Manufacturer: Innicor (SPEC)', 'Size: 79 mm', 'Length: 6.0 meters', 'Shots per Meter: 14', and 'Shots: 84'. It also has dropdowns for 'Charge Manufacturer: Innicor - Excaliber' and 'Charge Size: 16.5 gram DP 79mm SPEC'. A 'Price Overrides' section has checkboxes for 'Set Gun Price' and 'Set Charge Price', with corresponding price fields set to '0 *'. At the bottom, there are checkboxes for 'Fish Neck/Clam Shell', 'Switch', 'EBW Detonator', and 'PX-1 Detonator'. A note at the bottom states '* Prices are Per-Unit Values'.

KEY DART™ FEATURES

- Custom job entry interface
- Customizable pricing engine
- More accurate and consistent invoices
- XML export of invoice data
- Invoice transfer to remote offices
- Affordable software licensing

Flexible – Intuitive - Affordable
